PrivacyGuard Edge — DLP Risk Assessment Audit

Document Analyzed: Navina_M___ML_Engineer.pdf | **Audit Date:** 2026-09-28 13:57:03 UTC | **Engine:** PrivacyGuard Edge v2.0 (On-Device)

HIGH RISK
Risk Score: **144**/999

Key Recommendation:
High risk detected. Redact sensitive government IDs, financial numbers, or internal markers prior to distribution.

Critical: 0	**High:** 1	**Medium:** 1	**Low:** 47	**Total Findings:** 49

Risk Factors Identified:

• 1 financial record(s) detected (e.g. Credit Card, Bank Account, UPI).
• 12 personal information item(s) detected (PII).
• 36 business-sensitive classification or employee reference(s) found.
• Multiple data categories co-occur (3 categories), significantly increasing correlation risk.

Structured Findings Inventory (Masked):

Detailed Remediation Guidance (High / Critical Findings):

[HIGH] BANK_ACCOUNT_IN — This value matched the 'BANK_ACCOUNT_IN' pattern associated with financial information. Confidence is low — this may be a false positive; manual review recommended.

Recommended Action: Redact all account and card numbers. Ensure PCI-DSS compliance.
