PrivacyGuard Edge — Risk Assessment Report

Document: mixed_sensitive_document.docx
Generated: 2026-09-26 16:12

Risk Level: CRITICAL Score: 411

Reasons

• 3 government identifier(s) detected.
• 4 financial data point(s) detected.
• 2 credential-like value(s) detected — high risk if leaked.
• 3 personal information item(s) detected.
• 2 network-related value(s) detected.
• 3 business-sensitive marker(s) detected.
• Multiple sensitive categories co-occur (6), increasing correlation risk.

Recommendation

Do not share as-is. Redact all critical findings and route through internal review before distribution.

Findings

Type	Category	Masked Value	Severity	Confidence	Source
CONFIDENTIAL_MARKER	Business Information	IN**********LY	MEDIUM	95%	regex
EMPLOYEE_ID	Business Information	Em**********18	MEDIUM	95%	regex
EMAIL	Personal Information	ra**********om	MEDIUM	95%	regex
UPI_ID	Financial Information	ra**********le	MEDIUM	95%	regex
PHONE_IN	Personal Information	98******10	MEDIUM	95%	regex
DOB	Personal Information	14******98	MEDIUM	95%	regex
PAN	Government Identifier	AB******4F	HIGH	95%	regex
IFSC	Financial Information	HD*******34	HIGH	95%	regex
PASSWORD_FIELD	Credentials	pa**********99	CRITICAL	95%	regex
API_KEY_GENERIC	Credentials	ap**********34	CRITICAL	95%	regex
IPV4	Network Information	19********25	LOW	95%	regex
URL	Network Information	ht**********ds	LOW	95%	regex
CONFIDENTIAL_MARKER	Business Information	CO********AL	MEDIUM	95%	regex
AADHAAR	Government Identifier	23**********34	HIGH	90%	regex
AADHAAR	Government Identifier	12********12	HIGH	90%	regex
BANK_ACCOUNT_IN	Financial Information	12********12	HIGH	90%	regex
BANK_ACCOUNT_IN	Financial Information	98******10	HIGH	40%	regex

Explanations (High/Critical findings)

PAN (HIGH) — This value matched the 'PAN' pattern associated with government identifier. Detection method: Pattern matching. Confidence: High. Recommended action: Redact before sharing externally.

IFSC (HIGH) — This value matched the 'IFSC' pattern associated with financial information. Detection method: Pattern matching. Confidence: High. Recommended action: Redact before sharing externally.

PASSWORD_FIELD (CRITICAL) — This value matched the 'PASSWORD_FIELD' pattern associated with credentials. Detection method: Pattern matching. Confidence: High. Recommended action: Revoke/rotate this credential and redact before sharing.

API_KEY_GENERIC (CRITICAL) — This value matched the 'API_KEY_GENERIC' pattern associated with credentials. Detection method: Pattern matching. Confidence: High. Recommended action: Revoke/rotate this credential and redact before sharing.

AADHAAR (HIGH) — This value matched the 'AADHAAR' pattern associated with government identifier. Detection method: Pattern matching. Confidence: High. Recommended action: Redact before sharing externally.

AADHAAR (HIGH) — This value matched the 'AADHAAR' pattern associated with government identifier. Detection method: Pattern matching. Confidence: High. Recommended action: Redact before sharing externally.

BANK_ACCOUNT_IN (HIGH) — This value matched the 'BANK_ACCOUNT_IN' pattern associated with financial information. Detection method: Pattern matching. Confidence: High. Recommended action: Redact before sharing externally.

BANK_ACCOUNT_IN (HIGH) — This value matched the 'BANK_ACCOUNT_IN' pattern associated with financial information. Confidence is low — this may be a false positive; manual review recommended. Detection method: Pattern matching. Confidence: Low. Recommended action: Redact before sharing externally.
